

## Precision Meets Practicality: The SR-2009B OEM Folding Pocket Knife Experience

Shieldon Manufacturing & Trading Combo introduces the SR-2009B, a testament to their commitment to quality and functionality in the world of [OEM folding pocket knives](#). Designed for both the casual user and the knife enthusiast, the SR-2009B combines robust materials with a sleek design, offering a reliable cutting tool that is both accessible and efficient.

## Product Description

Item No. SR-2009B – This folding knife segment solidifies the essence of a versatile everyday carry (EDC) tool. With careful attention to detail and an understanding of the needs of a pocket knife user, Sheldon Manufacturing & Trading Combo has crafted an instrument that stands out in both form and function.

## Blade Excellence

Crafted with 3Cr13 stainless steel, the blade of the SR-2009B offers a balance of strength, sharpness, and corrosion resistance, ensuring long-lasting performance. The blade material is hardened to 50-52 on the Rockwell Hardness Scale (HRC), providing a good edge retention while maintaining ease of sharpening. Measuring 2.5mm or 0.098 inches in thickness, and 63mm or 2.48 inches in length, this clip point blade is designed for precision and versatility, making it suitable for a wide range of cutting tasks.

The black oxide coating on the blade does not simply add to its aesthetic appeal but also enhances its corrosion resistance, minimizing glare and reducing the blade's visibility, a feature appreciated in tactical applications.

## Handle Durability and Design

The handle of the SR-2009B is an amalgamation of strength and comfort. Utilizing 2Cr13 stainless steel coupled with ABS (Acrylonitrile Butadiene Styrene) plastic, the handle promises durability and a secure grip. The combination of materials ensures the knife can endure the rigors of daily use while providing a lightweight feel as indicated by the handle's thickness of 11mm or 0.433 inches.

Colored in classic black, the handle not only adds a professional touch but also makes the knife suitable for a variety of settings, from outdoor adventures to tactical operations.

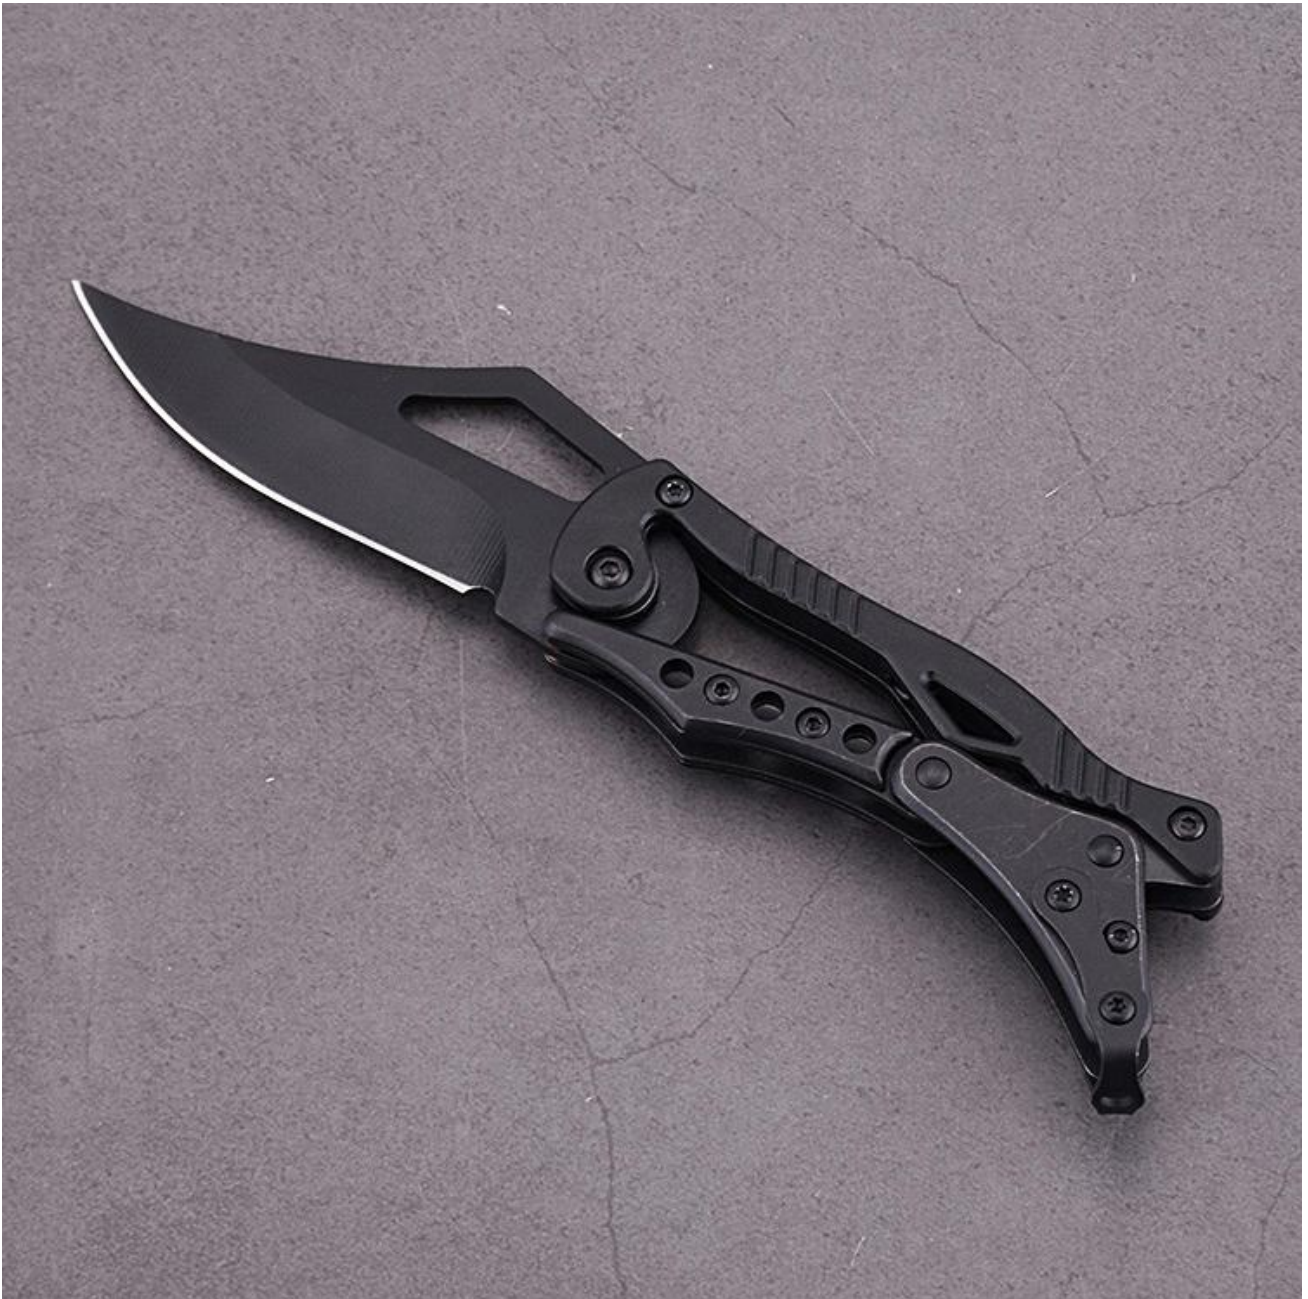

## Functional Features

With a total length of 160mm or 6.3 inches when open, and a weight of just 70g or 2.47 ounces, the SR-2009B is designed for portability and ease of use. The pocket clip is thoughtfully positioned for a tip-up carry, ensuring the knife is always ready for quick access and secure transport.

The mechanical lock mechanism is robust, providing safety and stability during use, while the hole opening feature allows for easy one-handed operation. These practical elements are

synonymous with Sheldon's ethos of blending safety, convenience, and ease of use.

### **Blade Style and Grind**

The SR-2009B boasts a clip point blade style, a popular choice for its versatility. This design offers a sharper point for controlled piercing and detail work, while the large belly of the blade is ideal for slicing. The flat grind further complements the blade's style, providing a fine edge

for cutting precision and ease of maintenance.

## Minimum Order Quantity (MOQ)

Recognizing the varying needs of their clientele, Shieldon Manufacturing & Trading Combo offers the SR-2009B with a regular MOQ of 600, ensuring that businesses of different scales can access quality knives without excessive inventory burden.

## The Shieldon Assurance

When it comes to OEM folding pocket knives, Shieldon Manufacturing & Trading Combo is not just another supplier; they are a partner in your product journey. With years of experience and a dedication to excellence, Shieldon is equipped to handle the unique needs of every customer. From the careful selection of materials to the rigorous quality control processes, each SR-2009B knife is a product of expertise and precision engineering.

## Use Cases

The SR-2009B is crafted to excel in various scenarios:

- **Outdoor Enthusiasts:** Campers, hikers, and survivalists will find the SR-2009B to be an

indispensable tool for preparing kindling, cutting cordage, or preparing food.

- **Everyday Carry:** For daily tasks such as opening packages, minor trimming jobs, or as a utility tool, this knife fits seamlessly into the rhythm of everyday life.
- **Professional Use:** Whether it's for a tradesman in need of a reliable cutting tool on the job or a first responder requiring a dependable knife for emergencies, the SR-2009B delivers.

## Conclusion

The SR-2009B from Sheldon Manufacturing & Trading Combo is more than just a knife; it is a symbol of the harmony between quality, functionality, and user experience. With flexibility in order quantities, attention to detail in design, and a relentless pursuit of manufacturing excellence, Sheldon ensures that every SR-2009B folding pocket knife is not just a product but

a trusted companion for its user. This knife is a reflection of Sheldon's unwavering commitment to providing cutting-edge solutions that meet and exceed the demands of the modern world.

## **Essential Guide to EDC Folding Knives: Your Daily Slice of Utility**

Everyday carry (EDC) knives are the unsung heroes of the daily routine, providing a portable solution for a multitude of tasks. A folding knife, with its compact design and ease of use, is a staple in the EDC gear of many individuals. In this guide, we will delve into the basics of EDC folding knives, how to carry them, and the proper way to open and close them safely and efficiently.

## Understanding the EDC Folding Knife

An EDC folding knife is a small, portable knife with a blade that folds into the handle. Unlike fixed-blade knives, folding knives offer an added level of safety and convenience, as the blade is securely tucked away when not in use. EDC knives are designed for a variety of tasks, from opening packages and envelopes to cutting rope or even as a means of self-defense in

emergency situations.

## Carrying an EDC Folding Knife

How you carry your EDC knife largely depends on personal preference and the specific design of the knife itself. Here are common ways to carry a folding knife:

- **Pocket Carry:** The most popular method is to simply place the knife in your pocket. Many EDC folding knives come with a pocket clip that allows for secure and discreet carry. Clip the knife to the edge of your pocket, ensuring the knife is easily reachable and the clip is facing outward for a quick draw.
- **Belt Carry:** Some prefer attaching their knife to their belt or waistband. Specialized sheaths or clips can secure the knife in place, offering easy access.
- **Neck Carry:** For smaller folding knives, wearing them around the neck with a lanyard or neck chain is an option. It provides quick access, though it is less discreet.

## Opening a Folding Knife

Opening a folding knife can be as simple or as intricate as the design of the knife allows. Here is a basic guide to opening most standard folding knives:

- **Manual Opening:** Grasp the knife handle firmly with one hand. With the other hand, locate the thumb stud or nail nick on the blade. Gently apply pressure and pivot the

blade out until it fully extends. Many knives feature a locking mechanism that will audibly click into place when the blade is fully open.

- **Assisted Opening:** Some EDC knives have a spring-assisted opening mechanism. Apply pressure to the thumb stud or flipper and the spring mechanism will do the rest, quickly opening the knife.
- **One-Handed Opening:** Many modern folding knives are designed for one-handed opening, often featuring a thumb hole or a flipper. Apply pressure to the thumb hole or flipper with your thumb or index finger to open the knife smoothly.

## Closing a Folding Knife

Closing a folding knife safely is as important as opening it. Follow these steps:

- **Lock Depress:** If your knife has a locking mechanism, locate the release. It may be a liner lock, frame lock, or back lock, among others. Press or slide the release to disengage the lock.
- **Careful Closure:** Once the lock is disengaged, carefully fold the blade back into the handle using your thumb to push the spine of the blade while ensuring your fingers are clear of the closing path.
- **Secure the Knife:** Make sure the blade is fully retracted into the handle and the lock, if present, is engaged to prevent accidental opening.

## Maintenance and Safety

Maintaining your [EDC folding knife](#) is crucial for its longevity and safe use. Regularly clean the blade and handle, lubricate the pivot point, and sharpen the blade as needed. Always exercise caution when using, opening, and closing your knife to prevent injury.

## Conclusion

An EDC folding knife is an indispensable tool for daily life, combining convenience with practicality. Whether for routine tasks or unexpected situations, knowing how to properly carry, open, and close your folding knife will enhance its utility and your safety. With proper care and knowledge, your EDC knife will be a dependable ally for years to come.
