

### Cutting Edge Precision: The OEM Folding Pocket Knife SS-0808 by Shieldon

Welcome to the latest innovation in the realm of utility and craftsmanship - the OEM Folding Pocket Knife SS-0808, presented by [Shieldon Manufacturing & Trading](#) Combo. This marvel of engineering and design is tailored for businesses looking to enhance their product lineup with a knife that embodies strength, durability, and aesthetic appeal.

### A Blade of Strength and Reliability

The heart of the SS-0808 lies in its robust blade, meticulously forged from 2Cr13 stainless steel. Renowned for its balance of hardness and resistance to corrosion, 2Cr13 steel ensures that the blade withstands the rigors of daily use while maintaining its sharp edge. The blade's hardness, rated at 41-47 on the Rockwell scale, strikes an optimal balance between flexibility and durability, making it less prone to breaking under stress.

**Precision Engineered for Performance**

Each blade spans 85mm (3.35 inches) in length and is shaped into a drop point style, an all-purpose design that excels in a variety of tasks, making it a versatile choice for everyday carry. The blade's thickness of 2.9mm (0.114 inches) provides a solid backbone, supporting the flat grind edge that delivers excellent slicing capabilities. The satin finish not only adds a sleek, professional look but also minimizes reflective glare and hides scratches.

**Ergonomic and Stylish Handle Design**

The handle of the SS-0808, constructed from the same 2Cr13 stainless steel as the blade, offers a seamless aesthetic and structural continuity. The silver-colored handle presents an elegant, monochromatic look that will impress enthusiasts and casual users alike. At 10.1mm (0.398 inches) in thickness, it provides a substantial feel in hand without being overly bulky, enhancing the knife's ergonomic qualities.

**Reliable Locking Mechanism for Safe Usage**

Safety is paramount when handling any blade, and the SS-0808's liner lock mechanism is a testament to Shieldon's commitment to secure knife design. This tried-and-true locking system provides a safe and reliable method to keep the blade firmly in place during use, preventing accidental closure and potential injury.

**Dimensions and Weight for Perfect Balance**

The SS-0808 boasts a total length of 199mm (7.83 inches) when fully extended, offering a sizable cutting edge without compromising on portability. The weight of the knife is an impressively manageable 148g (5.22 oz), balancing heft and lightness to create a tool that feels substantial yet comfortable for extended use.

**Customization for Distinction**

Recognizing that individuality is key in the competitive knife market, Shieldon offers comprehensive OEM services allowing for custom branding and personalization. The SS-0808 can become an exclusive piece that carries your brand's identity, from logo engraving to bespoke packaging options.

**Volume Meets Value: ODM Regular MOQ**

To cater to diverse business needs, Shieldon has set a reasonable Minimum Order Quantity (MOQ) of 3000 units for the SS-0808. This volume ensures economies of scale, making it a cost-effective addition to your catalog. Shieldon's expertise in logistics and international trade ensures that your order will be delivered efficiently and on time, regardless of your global location.

**Shieldon: A Partner in Your Business Growth**

As a Manufacturing & Trading Combo, Shieldon brings the dual advantages of in-house production expertise and savvy trading acumen. Businesses can expect comprehensive support, from initial design consultations to the final delivery of the product. The company's commitment to quality and customer satisfaction means that each knife undergoes stringent quality control to meet international standards.

### **Conclusion**

The OEM Folding Pocket Knife SS-0808 from Shieldon is more than just a tool; it is a statement of resilience, practicality, and elegance. Ideal for outdoor enthusiasts, DIY aficionados, or as a reliable everyday carry, this knife is set to become a flagship offering in your product suite. With Shieldon's dedication to quality, customer service, and flexibility in OEM customization, your business can confidently expand its inventory with a product that is sure to be in high demand.

As a forward-thinking enterprise, opting for the SS-0808 is not only an investment in a superior product but also an alliance with a manufacturer that understands the nuances of the global marketplace. Whether your aim is to provide a trustworthy tool for professional use or to offer a sophisticated accessory to knife collectors, the SS-0808 is poised to cut through the competition and carve out a significant presence in your market segment. Choose Shieldon's OEM Folding Pocket Knife SS-0808 - where exceptional quality meets strategic

sourcing.

### Essentials Unfolded: The Lowdown on EDC Folding Knives

Everyday carry (EDC) folding knives are the unsung heroes of the daily grind, seamlessly integrating into our lives as indispensable tools. As the name implies, an EDC folding knife is a knife that is designed to be carried on one's person every day, offering a combination of utility, accessibility, and discretion. In a world that constantly demands preparedness, an EDC folding knife is an essential companion. Here's your primer on understanding the basics of these versatile tools, their carriage, and their countless applications.

### Understanding EDC Folding Knives

EDC folding knives are small and portable cutting tools that fold into the handle, making them safe and convenient to carry in a pocket, on a belt, or in a bag. Unlike fixed-blade knives, folding knives feature a pivot point mechanism, allowing the blade to fold away and prevent accidental injuries when not in use.

## Construction and Features

A typical EDC folding knife consists of a blade, a handle, a locking mechanism, and often a clip for attachment. The blade is usually made from high-grade steel, ensuring edge retention and corrosion resistance. The handle could be crafted from various materials, including metals, hard plastics, or composites, offering durability and comfort. Locking mechanisms, such as liner locks or frame locks, secure the blade in the open position for safe operation. A clip is often attached to the handle for easy carry.

## How to Carry an EDC Folding Knife

Carrying an EDC folding knife is a matter of personal preference and comfort, as well as local laws and regulations. Here are some common methods:

1. **Pocket Carry:** Many EDC knives come with a pocket clip that allows you to secure the knife to the edge of your pocket, providing easy access and secure placement.
2. **Belt Carry:** Some prefer to carry their knife on their belt, either in a sheath or clipped to the belt itself, which can offer quicker access and reduce pocket clutter.
3. **Bag Carry:** If you carry a bag, pouch, or backpack, you might choose to store your folding knife there. Ensure that it is readily accessible and secured within a dedicated compartment.

### Daily Applications of an EDC Folding Knife

The value of an EDC folding knife lies in its versatility. Here are some common uses:

1. **General Cutting Tasks:** From opening packages to cutting strings and cords, an EDC folding knife excels at making quick work of everyday cutting chores.
2. **Food Preparation:** Whether you're slicing an apple for a snack or preparing a picnic, a clean EDC knife can be a handy tool.
3. **Emergency Situations:** In a pinch, an EDC knife can cut through seatbelts, tape, or clothing in emergency situations.
4. **Outdoor Activities:** For the outdoorsy type, a folding knife is essential for whittling wood, preparing kindling, or completing other campsite tasks.
5. **Self-Defense:** While not their primary purpose, EDC knives can serve as a last-resort self-defense tool if needed.

6. **Crafts and Hobbies:** For DIY enthusiasts, a folding knife is a go-to tool for precision work like cutting paper, carving models, or detailed woodworking.

### **Safety and Maintenance**

Carrying and using an EDC folding knife comes with the responsibility of handling it safely. Always cut away from your body, keep the knife clean, and maintain a sharp edge for safe and effective use. Regularly inspect the locking mechanism to ensure it's functioning correctly.

### **Responsible Ownership**

Being a responsible EDC folding knife owner means staying informed about local knife laws, which can vary widely. Some areas may have restrictions on blade length, locking mechanisms, or the method of carry. Always ensure you comply with the laws in your area.

**Conclusion**

In conclusion, an [EDC folding knife](#) is a multi-faceted tool designed for daily use and convenience. It exemplifies preparedness and functionality, serving a myriad of purposes that range from mundane tasks to emergency responses. Its method of carry should prioritize accessibility and safety, while its use should always be governed by the laws of your jurisdiction. By understanding the basic knowledge of EDC folding knives, you can integrate this practical tool into your everyday life, ensuring you're always prepared for what lies ahead.
