

Custom Craftsmanship Meets Compact Utility: The OEM Mini Pocket Knife SS-0812

In the world of custom knives, the allure of personalized perfection meets the practicality of everyday carry with the OEM Mini Pocket Knife SS-0812. [Shieldon Manufacturing & Trading](#) Combo brings this exceptional piece to connoisseurs and casual users alike, who appreciate the fine balance of traditional craft and modern functionality. Here is a purchasing description that encapsulates the essence of this folding knife.

Introducing the OEM Mini Pocket Knife SS-0812

Item NO.: SS-0812

With its meticulous design and robust construction, the SS-0812 from Shieldon is a testament to the seamless

blend of form and function. This folding knife segment is designed to cater to the discerning needs of a market that values precision and portability.

Precision Engineered Blade

Crafted from 2Cr13 stainless steel, the blade of the SS-0812 is engineered for resilience and reliability. With a hardness rating (HRC) of 41-47, it provides a good balance of edge retention and ease of sharpening. The drop point blade style, measuring a compact 60mm (2.36 inches) in length and 2.6mm (0.102 inches) in thickness, offers versatility for everyday tasks while ensuring strength for more demanding cuts.

The blade is treated with a grey oxide coating, enhancing its resistance to corrosion and wear while imparting a sleek, understated aesthetic. Complementing the sturdy blade is a flat grind, which ensures a sharp edge and easier maintenance, making it a reliable companion for precision cutting.

Ergonomic Wood Handle

The handle of the SS-0812 is a fusion of natural elegance and ergonomic design. Constructed from durable wood, complemented by 2Cr13 stainless steel, it brings warmth and individuality to each piece. The wood's unique grain patterns mean no two knives are identical, providing a one-of-a-kind experience for the user. The handle thickness stands at a comfortable 14.5mm (0.571 inches), designed to fit securely in the palm for control and comfort.

Compact and Portable

This mini pocket knife boasts a total length of 147mm (5.79 inches) when opened, making it an ideal size for a daily carry tool. Its weight of 99.5g (3.51 ounces) strikes the perfect balance between heft and lightness, ensuring it's substantial enough for a variety of tasks yet unobtrusive when carried in a pocket or purse.

Secure Locking Mechanism

The SS-0812 is equipped with a liner lock mechanism, a popular choice for modern folding knives. This lock provides a secure means to ensure the blade remains fixed during use, thereby increasing safety for the user. Its intuitive design allows for easy one-handed operation, making the knife convenient and quick to engage or disengage.

Customization and Availability

As a part of Sheldon's OEM service, the SS-0812 provides ample opportunity for customization. The wooden handle can be etched, burned, or inlaid to suit brand specifications or personal preferences. The ODM Regular MOQ for this model is set at 3000 units, a testament to Sheldon's capability to fulfill both large-scale distribution and specialized, high-volume orders.

Quality Assurance

Every SS-0812 knife is subject to Sheldon's rigorous quality control standards. From the initial steel selection to the final inspection before shipping, each step is monitored to ensure that the product meets the high expectations of Sheldon and their customers.

Packaging and Design Services

Understanding the importance of presentation, Sheldon offers comprehensive packaging and design services. Buyers can collaborate with Sheldon's team to create packaging that reflects the brand's identity and appeals to the target market. This value-added service ensures that the product not only performs well but also resonates with the end user right from the point of unboxing.

Purchasing with Sheldon

Choosing Sheldon for your sourcing needs means partnering with a company that prioritizes quality, craftsmanship, and customer satisfaction. Orders for the SS-0812 can be placed with ease, and the knowledgeable Sheldon sales team is on hand to guide buyers through the process, from initial inquiry to final delivery.

The Ideal Choice for Diverse Markets

The OEM Mini Pocket Knife SS-0812 is crafted to appeal to a wide range of users, from outdoor enthusiasts to everyday carry advocates, from custom knife aficionados to those seeking a practical utility blade. Its design is a nod to classic aesthetics while embracing modern demands, making it a versatile and attractive offering in any market.

**In Conclusion**

The OEM Mini Pocket Knife SS-0812 stands as a shining example of Sheldon's commitment to quality and attention to detail. With its robust 2Cr13 blade, ergonomic wooden handle, and reliable liner lock mechanism, the SS-0812 is more than just a folding knife—it's a pocket-sized testament to the proud tradition of knife making. This description serves not only as a guide to its features but also as an assurance of the value and excellence that Sheldon brings to every product.

Buyers looking to source the SS-0812 can do so with confidence, knowing that they are investing in a product that embodies the precision, style, and functionality that Sheldon is renowned for. Whether for resale or corporate gifting, the SS-0812 is poised to meet and exceed expectations, solidifying its place as a premium choice in the world of OEM folding knives.

The Essentials of EDC: A Guide to Folding Knives

Understanding the basics of an Everyday Carry (EDC) folding knife is fundamental for anyone interested in pocket knives, whether you're a seasoned collector or a newcomer. An EDC folding knife is a versatile, portable tool that's designed to be carried daily, serving a variety of purposes ranging from routine tasks to emergency situations. This guide aims to provide an overview of what an EDC folding knife is, how to carry one, and the essential components that make up its structure.

What Is an EDC Folding Knife?

An EDC folding knife is a small, portable knife with a blade that folds into the handle. Unlike fixed-blade knives, folding knives are compact and safe to carry in a pocket or bag, making them an ideal choice for everyday carry. They can be employed for a myriad of tasks such as opening packages, cutting cordage, preparing food,

or as a means of self-defense.

EDC knives are designed with convenience and accessibility in mind. They typically feature a mechanism that allows for quick and easy one-handed opening and secure locking during use. The size, blade shape, and additional features are often selected based on personal preference and the intended daily tasks.

How to Carry an EDC Folding Knife?

Carrying an EDC folding knife can be done in several ways, depending on the design of the knife and the carrier's preference:

1. **Pocket Clip:** Many EDC knives come with a clip that allows you to secure the knife to the edge of a pocket. This keeps the knife readily accessible while ensuring it stays in place.
2. **Keychain:** Smaller EDC knives may have a hole or ring at the handle's end, making them suitable for attachment to a keychain.

3. **Sheath or Pouch:** Some prefer to carry their knife in a small sheath or pouch that can be placed in a pocket or attached to a belt.
4. **Lanyard:** Attaching a lanyard to your knife allows for easier retrieval from deep pockets or a bag.

It is essential to be aware of local laws regarding knife carry, as regulations on blade length and locking mechanisms can vary.

Structure of a Folding Knife

Understanding the anatomy of a folding knife is critical for proper use and maintenance. Here are the key components that make up the structure:

1. **Blade:** The cutting part of the knife. EDC knife blades come in various shapes and sizes but are generally made from high-quality steel for durability and edge retention.
2. **Handle:** The part you grip when using the knife. Handles can be made from a variety of materials including metals, synthetic polymers, and wood. They provide stability, grip, and control while using the knife.
3. **Pivot:** This is the point where the blade rotates when opening and closing the knife. The pivot must be strong and durable to withstand repeated use.
4. **Locking Mechanism:** A vital safety feature on many EDC knives, the lock ensures the blade stays open during use and doesn't close accidentally. Common types include liner locks, frame locks, and lock backs.
5. **Opening Mechanism:** Many EDC knives have thumb studs, flippers, or holes in the blade that allow for easy one-handed opening.
6. **Clip:** An external clip attached to the handle that allows the knife to be fastened to a pocket or belt for easy carry.
7. **Thumb Ramp or Jimping:** Some knives have textured sections on the blade spine or handle for improved thumb grip.
8. **Spacer/Backspacer:** Found in the handle, this piece ensures the knife's stability and rigidity.
9. **Lanyard Hole:** A hole at the end of the handle where you can attach a lanyard for easy access.

Conclusion

An [EDC folding knife](#) is an indispensable tool that combines convenience, efficiency, and safety in a compact form. Understanding how to carry one properly and recognizing the individual components is crucial for anyone who relies on a folding knife for daily tasks. Whether for utility or emergency, an EDC knife stands as a testament to preparedness, embodying practicality in the palm of your hand. The thoughtful design of EDC knives, like those offered by Sheldon, ensures that users are equipped for any situation with confidence and ease.
