Handle Color: Blue

Pocket Clip: Tip-Up

Lock Mechanism: Liner Lock

Opening Mechanism: Flipper + Thumb Stud

Blade Finish: Stonewash

Blade Grind: Flat

Standard MOQ: 1200 Units for ODM

Functional Elegance: The Blade

At the heart of the XW-1001 lies its formidable clip point blade, crafted from 3Cr13 stainless steel, known for its excellent balance of toughness, edge retention, and ease of sharpening. With a hardness of 50-52 on the Rockwell scale, it withstands the rigors of daily use while staying true to its sharpness. The blade's stonewash finish is not just about the rugged, wear-resistant aesthetic; it's a testament to the knife's readiness to face the challenges of both the great outdoors and urban escapades.

Engineered for Comfort: The Handle

Encasing the dynamic blade is the ergonomically sculpted handle, fashioned from high-grade anodized aluminum. This material is celebrated for its lightweight properties, corrosion resistance, and ability to take on a vibrant blue hue that won't fade over time. The handle's strategic texturing ensures a secure grip under all conditions, while its moderate thickness strikes the perfect balance between comfort in the hand and compactness in the pocket.

Seamless Operation: Deployment and Locking

Intuitive and user-friendly, the knife opens effortlessly via a flipper and thumb stud mechanism, catering to both quick, one-handed deployment and ambidextrous use. At the core of its functionality, the reliable liner lock secures the blade in place, providing the user with confidence during demanding tasks.

**Clip and Carry: Pocket Clip**

The tip-up pocket clip is designed for practicality and discretion. It allows for deep carry, ensuring that the knife sits low in the pocket for a subtle profile, while also providing quick and easy access for daily tasks.

Tailored for Your Brand: Customization with Shieldon

With Shieldon's OEM services, you can imprint your brand's identity onto the XW-1001. Customize the handle with laser-engraved logos or patterns, and select from an array of anodization colors beyond the standard blue. This model becomes an extension of your brand, a signature item that resonates with your audience.

Bulk Order Capability: ODM Regular MOQ

Our ODM services accommodate large-scale production with a regular minimum order quantity (MOQ) of 1200 units. This allows businesses to secure competitive pricing while obtaining a high-quality product that

reflects the unique needs of their market.

Quality Assurance: Sheldon's Commitment

At Sheldon, quality is not just a feature; it's a promise. From the initial steel selection to the final inspection, every XW-1001 is subjected to rigorous quality control standards, ensuring that each knife meets our clients' expectations for excellence.

Efficient Logistics: Global Shipping Solutions

Partnering with Sheldon goes beyond just crafting the perfect product. We also provide comprehensive shipping solutions that ensure safe, timely, and cost-effective delivery of your order, no matter the destination. Our expertise in customs clearance and international logistics means we navigate the complexities of global trade, so you don't have to.

After-Sales Service: Your Satisfaction, Our Priority

Our relationship with clients extends past the point of sale. We offer reliable after-sales support to address any concerns or queries post-purchase. Your feedback drives our continuous improvement and helps us serve you better with every order.

**Conclusion**

The Sheldon OEM Folding Pocket Knife XW-1001 is more than just a tool; it's an asset that elevates your brand and endears it to your target market. With its impeccable blade, ergonomic handle, and seamless functionality, coupled with our comprehensive manufacturing, customization, and logistics services, you place an order for success. In the world of EDC, where each detail matters and every choice counts, the Sheldon XW-1001 stands out as a beacon of quality and style. Make it a part of your offering and watch as it cuts through the competition, leaving a lasting impression on your clientele.

The Essential Guide to Pocket Knife Clips:

Understanding Variety and Function

A folding knife is a staple tool for many, from the great outdoors enthusiasts to the everyday urban dwellers. Among its many features, the pocket clip stands as a pivotal yet often overlooked element. It's not just a piece of metal; it's the intersection of convenience, accessibility, and personal preference. With various types of pocket clips available, understanding their differences is crucial for anyone looking to choose the right folding knife. Let's delve into the world of pocket knife clips and explore the variety that awaits.

The Standard Clip

The most common type of pocket clip is the standard clip. This design is straightforward, typically attached with two to three screws and keeps the knife oriented blade down in the pocket. The standard clip is reliable and functional, offering a balance between secure retention and ease of access.

The Deep Carry Clip

For those who prioritize concealment and security, the deep carry clip is the go-to choice. This design allows the knife to sit deeper in the pocket, making it less noticeable and reducing the chance of it being accidentally pulled out or lost. Deep carry clips often have a longer body that rides along the edge of the pocket, providing a discreet profile.

The Wire Clip

Wire clips are a minimalist's dream. Made from a single piece of shaped wire, this type of clip is lightweight and less intrusive than other types. The simplicity of the design does not detract from its function; wire clips offer ample tension to keep your knife securely in place without adding bulk.

**The Movable Clip**

Versatility is the name of the game for movable clips. These clips can be repositioned to different spots on the knife, allowing for tip-up or tip-down carry, and in some cases, catering to both left and right-handed users. The customization offered by movable clips ensures that the knife can be carried in the way that is most comfortable and convenient for the individual.

The Integral Clip

As the name suggests, integral clips are manufactured as part of the knife handle itself. This design is typically found on higher-end knives and is appreciated for its sleek appearance and sturdy construction. Integral clips usually offer a very secure hold, as they are made from the same material as the handle, such as titanium or stainless steel.

The Split Clip

The split clip design features two separate arms that work together to clip onto the pocket. This design often provides a stronger grip on the pocket, ensuring that the knife stays in place. While not as common as other types, the split clip can be a great option for those who engage in more rigorous activities where knife retention is paramount.

The Sculpted or Custom Clip

For knife enthusiasts who value aesthetics as much as function, sculpted or custom clips are appealing. These are often designed with unique patterns, shapes, and materials, adding a touch of personality and artistry to the knife. While they can be functional, the primary draw of these clips is their distinctive look.

Selecting the Right Clip

When choosing a pocket clip, consider the following:

- **Concealment:** How discreet do you want your knife to be?
- **Accessibility:** How quickly do you need to be able to access your knife?
- **Comfort:** How does the clip feel in hand, and when sitting or moving?
- **Durability:** What materials and designs are most likely to withstand your daily activities?
- **Aesthetics:** Does the clip's design align with your personal style?

Conclusion

The pocket clip of a [folding knife](#) might seem like a small detail, but it plays a significant role in the functionality and comfort of the knife. From standard to sculpted, each type of clip has its own set of advantages that can enhance the carrying experience. Whether you're a first-time buyer or a seasoned collector, taking the time to understand the different kinds of pocket clips will help you make an informed decision, ensuring that your folding knife is as practical and personal as every other tool you choose to carry. Remember, the right clip will not only keep your knife secure but will also reflect your lifestyle and preferences. Choose wisely, and your folding knife will be a faithful companion for years to come.
