Sheldon, with its extensive experience in [Manufacturing & Trading](#) Combo, presents the HF-K05011AL2-3 - an OEM army knife that is a classic bestseller, perfect for the outdoor enthusiast. This 15 in 1 army knife is a versatile tool designed to cater to a host of practical needs, making it an indispensable companion for any adventure. Below, we delve into a comprehensive purchasing description of this robust multi-tool.

### Product Overview

The HF-K05011AL2-3 army knife by Sheldon is an innovative piece of craftsmanship that combines utility, durability, and style. The main body of the knife is crafted from premium 2Cr13 stainless steel, known for its strength and resistance to corrosion, making it ideal for the rigors of outdoor use. The aluminum handle, presented in a

bold red color, not only adds a touch of elegance but also ensures a lightweight feel without compromising on durability.

## Specifications and Features

- **Item Number:** HF-KO5011AL2-3
- **Segment:** Army Knife
- **Materials:** The main body is made from high-grade 2Cr13 stainless steel, while the handle is constructed from sturdy aluminum.
- **Size & Weight:**
  - Closed Length: 3.82" / 97mm
  - Opened Length: 6.3" / 160mm
  - Total Thickness: 0.75" / 19mm
  - Blade Length: 2.36" / 60mm
  - Weight: 4.62 oz / 131g
- **Color:** The handle is finished in a vibrant red, providing high visibility and a striking appearance.
- **Functions:** This army knife features 15 different functions, making it the ultimate multi-tool for any task at hand:
  - **Sharp Knife:**For precise cutting and slicing.
  - **Scissors:**Handy for snipping materials or grooming tasks.
  - **Saw:**For cutting wood or other tough materials.
  - **Fish Scaler:**Essential for anglers.
  - **Hook Remover:**Safely remove hooks from your catch.
  - **Bottle Opener:**Enjoy a beverage anywhere, anytime.
  - **Flat Screwdriver:**Tighten or loosen screws effortlessly.
  - **Can Opener:**Access canned goods when on the move.
  - **Corkscrew:**Open wine bottles with ease.
  - **Leather Punch:**Create or enlarge holes in leather material.
  - **Nail File:**Keep nails smooth and clean.
  - **Needle:**For on-the-go repairs.
  - **Phillips Screwdriver:**Versatility for different screw types.
  - **Key Ring:**Attach your knife to your keys or gear.
  - **Ice Chisel:**Break ice or chip away at frozen surfaces.

### Applications and Usability

The versatility of the HF-K05011AL2-3 army knife is unparalleled. It's a comprehensive tool that addresses the multifunctional needs of campers, hikers, fishermen, and even everyday users who appreciate a tool that can handle unexpected situations. With its ample features, this army knife can assist in setting up camp, preparing food, making quick repairs to gear, and ensuring you're ready for anything the great outdoors throws your way.

### Quality and Reliability

Shieldon's commitment to quality is evident in this army knife. Each feature is meticulously designed and tested to ensure reliability when it matters most. The robust construction guarantees that the tool will withstand repeated use in various conditions, whether it's exposed to moisture, dust, or extreme temperatures.

## Customization and Order Details

For those interested in making this OEM army knife their own, Sheldon offers customization options, allowing businesses to brand the knife with logos or specific design elements. The regular MOQ for ODM is set at 3000, making it an accessible choice for companies looking to offer a high-quality promotional item, upscale retail product, or a practical corporate gift.

## Responsible Manufacturing

Purchasing from Sheldon not only means acquiring a top-quality product but also supporting a company that is devoted to sustainable and ethical manufacturing practices. Sheldon ensures that all stages of production meet the highest standards of labor conditions and environmental consciousness.

### Packaging and Delivery

The HF-K05011AL2-3 army knife is packaged with care to ensure it reaches you in pristine condition. Sheldon's efficient delivery network means that your order is shipped and delivered promptly, with all the necessary precautions to prevent damage during transit.

### After-Sales Service

Sheldon's relationship with its clients doesn't end with the delivery of the product. They provide exemplary after-sales service, addressing any concerns and ensuring customer satisfaction. With Sheldon, you have a partner that stands behind their product, ready to provide support whenever needed.

## Final Words

The Sheldon HF-K05011AL2-3 army knife is more than just a tool; it's a testament to the company's dedication to quality, innovation, and responsible manufacturing. Whether you're scaling a mountain, setting sail on a fishing expedition, or simply preparing for life's everyday adventures, this knife is designed to be by your side, ensuring that you're well-equipped to face any challenge. It's not just a purchase; it's an investment in reliability, functionality, and peace of mind for the discerning customer who values excellence in every aspect of their gear.

## Preserving Your Legacy: The Art of Storing Collectible Army Knives

For knife enthusiasts and collectors, an army knife is not just a tool; it's a piece of history, a work of art, and a testament to craftsmanship. To maintain the condition and value of your collectible army knives, proper storage is essential. Here's a guide on how to store your precious collection while ensuring each piece remains in prime condition for years, or even generations, to come.

## Understanding Your Army Knife's Needs

Before diving into storage solutions, it's crucial to understand what can harm your knives. Factors like moisture, temperature fluctuations, dust, and direct sunlight can affect the metal and handles, leading to corrosion, fading, and degradation of materials. Knowledge of these elements informs how and where you store your army knives.

## Controlled Environment

Ideally, collectible knives should be stored in a controlled environment. This means a space where humidity and temperature are kept constant to prevent rust and other forms of corrosion. A room with a dehumidifier can work wonders, especially in damp climates. The temperature should be moderate, avoiding extremes that could lead to expansion and contraction of different materials, which may cause cracking or warping.

### Individual Protection

Each knife should have its own protective layer. This could be a sheath, case, or protective cloth wrap. If using sheaths, ensure they are made of materials that won't encourage moisture retention, like leather. Consider acid-free tissue paper or a microfiber cloth for wrapping, especially for knives that you display or handle regularly.

### Display Cases

For collectors who enjoy showcasing their army knives, a display case is a perfect solution. Choose cases that offer a soft lining to prevent scratches and are designed to protect the contents from dust. If the case has a transparent lid or sides, ensure it's made from UV-resistant material to shield the knives from light damage.

### Storage Boxes and Drawers

If you prefer to store your knives out of sight, specialized storage boxes or drawers can be used. These are often lined with foam or fabric to keep knives secure and to prevent them from knocking into each other, which can cause damage. Remember to place knives flat and avoid stacking them.

### **Maintenance Before Storage**

Before storing your knives, it's important to ensure they are clean and dry. Use a soft, lint-free cloth to wipe down each knife. You can apply a thin layer of oil to the blade to prevent rust—choose an oil that's designed for preserving metal and won't become sticky or gummy over time.

### **Regular Checks**

Even with the best storage conditions, it's wise to inspect your knives regularly. This allows you to catch any potential issues early, such as the onset of rust or a degradation of materials, and address them before they become serious.

### **Storage Tips for Specific Knife Components**

- **For Metal Components:** Use silica gel packs in your storage area to absorb excess moisture. Ensure that the storage area is free from fumes or other chemicals that can cause oxidation.
- **For Wooden Handles:** Avoid extreme dryness, which can cause wood to crack. A bit of wood conditioner every now and then can keep wooden handles from drying out.
- **For Synthetic Handles:** Ensure they are kept away from solvents and chemicals that can cause the material to break down.

### Avoiding Common Storage Mistakes

- **Do not store knives in leather sheaths for long periods**, as leather can attract moisture and promote rust.
- **Avoid plastic bags** as they can trap moisture and cause condensation.
- **Do not store knives in basements or attics** where temperature and humidity are not controlled.

### In Conclusion

Storing your collectible army knives with care is a rewarding practice that will preserve their beauty, functionality, and value. By providing a controlled environment, individual protection, and regular care, your treasured collection will remain in excellent condition, ready to be admired and used when the time calls. Remember, these knives are more than just blades—they are stories, experiences, and legacies that deserve to be protected and passed down through the ages.
