

## Dazzling Elegance Meets Practical Design: The Shieldon LS-2567 OEM Folding Knife

When it comes to sourcing [OEM folding knives](#) that combine both aesthetic allure and functional resilience, the Shieldon LS-2567 model stands out as an exemplary choice. Tailored to meet the needs of brands looking to enhance their product offerings with a touch of sophistication, the LS-2567 delivers an impeccable balance of design, material quality, and craftsmanship. Below is a detailed purchasing description of this standout model that encapsulates its value proposition for your business.

**Product Overview: The Shieldon LS-2567 Folding Knife**

The Sheldon LS-2567 is a meticulously crafted folding knife that boasts a perfect blend of durability and style. Designed for discerning customers seeking a robust yet elegant cutting tool, this knife features a 3Cr13 blade known for its solid performance and ease of sharpening, anodized aluminum handle for lightweight strength, and a striking rainbow titanium coating finish that captures the eye.

### **Blade Excellence: Robust 3Cr13 Material**

At the heart of the LS-2567 lies its spear point blade, constructed from 3Cr13 stainless steel, an alloy celebrated for its balance of hardness and corrosion resistance. With a hardness rating of 50-52 HRC, the blade offers a reliable edge retention for consistent cutting power. A thickness of 0.11 inches (2.8mm) ensures the blade remains strong and steady during use, while the overall blade length of 3.78 inches (96mm) provides ample cutting surface for a variety of tasks.

### **Handle Durability: Anodized Aluminum Construction**

Encasing the robust blade is a handle crafted from anodized aluminum, regarded for its high strength-to-weight ratio. The handle's black color adds a touch of class and practicality, concealing everyday wear and tear. Measuring 0.512 inches (13mm) in thickness, the handle provides a substantial grip without adding unnecessary bulk, while the total length of the knife

when opened is 8.98 inches (228mm), making it a suitable size for various hand sizes and a versatile choice for many applications.

### **Lightweight and Portable: Optimal Carry Weight**

Portability is a key factor for everyday carry items, and the LS-2567 ticks this box with a lightweight profile weighing in at just 3.7 ounces (105g). It provides the ideal balance between heft and comfort, ensuring it can be carried all day without inconvenience.

### **Distinctive Style: Rainbow Titanium Coating Finish**

One of the most striking features of the LS-2567 is its rainbow titanium coating finish. This not only adds a splash of vibrant color to the knife but also enhances the blade's resistance to wear and tear. The unique coloring process ensures that no two knives are exactly alike, giving each piece a unique character.

### **Functional Design: Practical Blade Style and Handle Features**

The spear point blade style is a testament to the knife's versatility, making it adept at piercing and slicing. This functional shape is complemented by the spike grind, which allows for precise cutting and easy maintenance.

The handle's black color is sophisticated, ensuring that the knife remains stylishly discreet even during the most rigorous of tasks. A tip-down pocket clip is included for secure and convenient carry, while the liner lock mechanism provides a safe and reliable means to keep the blade securely in place when opened.

**Ease of Use: User-Friendly Opening Mechanism**

Operating the LS-2567 is a breeze thanks to its flipper open way. This feature allows for quick and effortless one-handed opening, a crucial factor for a tool that might be needed urgently in various scenarios.

### **Customizable for Your Brand: OEM Service with Low MOQ**

Shieldon's OEM service is designed to accommodate businesses of varying sizes, with a Regular MOQ of 1200 units, making it accessible for brands to start their own line of customized knives without the need for a large initial investment.

### **Quality Assurance: Shieldon's Guarantee**

At Shieldon, every step of manufacturing is carried out with a strict adherence to quality standards. Shieldon is ISO 9001 certified, assuring customers of its commitment to consistent quality control and production excellence. The LS-2567 is a product of this rigorous process, ensuring that each knife you receive is crafted to perfection.

### **Ideal for a Range of Markets**

The Shieldon LS-2567 is not only a tool but also a statement piece. It's perfectly suited for outdoor enthusiasts, collectors, and everyday users who appreciate a blend of functionality and

style. The knife's aesthetic appeal makes it an excellent addition to any retail lineup, while its robust build satisfies those who demand performance from their cutting tools.

### **Conclusion: Your Premier Choice for an OEM Folding Knife**

Purchasing the Sheldon LS-2567 folding knife means investing in a product that offers an exceptional user experience. The thoughtful design, quality materials, and eye-catching finish make it a standout option for businesses looking to offer their customers a premium product.

With Sheldon's commitment to quality and customer service, you can be confident that the LS-2567 will be a valuable and attractive addition to your product range.

## **Mastering the Essentials: The Fundamentals of EDC Folding Knives**

In the world of knives, the EDC (Everyday Carry) folding knife stands out as a cornerstone of practicality and convenience. This guide will equip you with the basic knowledge to understand what an EDC folding knife is, how to properly use one, and the best practices for maintaining it to ensure longevity and optimal performance.

### **What is an EDC Folding Knife?**

An EDC folding knife is a compact, portable knife that is designed to be carried daily for a variety of tasks – from opening packages to cutting cord, and even for self-defense in emergencies. Unlike fixed-blade knives, EDC folders are versatile in that they can be safely tucked away when not in use, thanks to their folding mechanism.

## Characteristics of EDC Folding Knives:

- **Blade Size:** Typically, EDC knives feature a blade length of 2 to 6 inches, which provides a good balance between utility and portability.
- **Locking Mechanism:** A reliable EDC knife will have a robust locking system, such as a liner lock, frame lock, or lockback, to ensure the blade does not inadvertently close during use.
- **Handle Material:** Handles can be made from various materials including aluminum, titanium, or reinforced plastics, offering durability and grip comfort.
- **Opening Mechanism:** Common opening methods include thumb studs, flipper tabs, or assisted opening mechanisms for quick and easy blade deployment.

## How to Use an EDC Folding Knife:

Using an EDC folding knife requires knowledge of its features and how to handle it safely:

1. **Opening:** To open the knife, locate the opening mechanism. If it's a thumb stud, place your thumb on the stud and apply pressure until the blade swings out and locks into place. For flipper tabs, use your index finger to press the tab down and outward.
2. **Handling:** Always hold the knife firmly by the handle and keep your fingers away from the path of the blade. When cutting, use controlled motions and cut away from your body.
3. **Closing:** Disengage the locking mechanism with one hand, usually by pressing it to one side, and carefully fold the blade back into the handle with the other hand. Ensure your fingers are clear from the closing path of the blade.

## Safety Tips:

- Never use a folding knife for prying or as a screwdriver.
- Keep the knife dry and clean to prevent injury and maintain function.
- Regularly check the locking mechanism for wear and proper function.

## How to Maintain an EDC Folding Knife:

Proper maintenance is crucial for the performance and lifespan of your EDC knife:

1. **Cleaning:** After use, clean the blade and handle with water and a mild detergent. Dry it thoroughly to prevent rust and corrosion. For folding knives, ensure that debris is cleared from the pivot area to keep the opening and closing action smooth.
2. **Lubrication:** Apply a lubricant designed for knives to the pivot point and the locking mechanism. This reduces friction and wear, allowing for smoother operation.
3. **Sharpening:** Keep your blade sharp using a whetstone, honing rod, or a dedicated knife sharpener. A well-maintained edge enhances cutting efficiency and safety.
4. **Storage:** When not in use, store your knife in a dry environment. If your knife will not be used for an extended period, it's advisable to apply a light coat of oil to the blade to prevent rust.
5. **Inspection:** Regularly inspect your knife for loose screws or components, signs of wear, or damage. Tighten any loose parts and replace the knife if it's damaged beyond repair.

**Conclusion:**

An EDC folding knife is not just a tool; it's a daily companion that demands respect and care. Understanding how to properly use and maintain your [EDC knife](#) ensures that it remains reliable, safe, and ready at a moment's notice. Embrace these fundamentals and you'll not only maximize the utility of your folding knife but also enjoy the satisfaction that comes from confidently handling and caring for your EDC gear. With these insights, your EDC knife will be more than just a tool—it will be an extension of your readiness for daily challenges.
