

Versatile Visions: Sheldon's Customizable OEM Folding Knife Set JLD-YK733

Discover the essence of adaptability and personalized choice with Sheldon's [OEM Folding](#)

[Knife](#) Set JLD-YK733 – a perfect blend of practicality and style for enthusiasts and brands alike.

This expertly crafted set offers a spectrum of customization options suited to fit any retailer's inventory or a collector's showcase.

Robust Blade Construction

The heart of any folding knife is its blade, and the JLD-YK733 does not disappoint. Made from 3Cr13 stainless steel, known for its balance of hardness and corrosion resistance, this knife offers reliable performance for everyday tasks. The steel composition ensures a blade with an HRC (Hardness Rockwell C) of 50-52, providing a solid cutting edge without compromising on toughness.

At a blade thickness of 0.091 inches (2.3mm), the JLD-YK733 strikes the perfect balance between durability and precision. The blade length of 1.97 inches (50mm) makes it a compact but effective tool for a multitude of cutting needs. Finished with a satin touch, the blade presents a sleek look while the flat grind guarantees a consistently sharp edge with easy maintenance.

Ergonomic and Aesthetic Handle

The handle is crafted from high-quality plastic, offering a lightweight yet durable option for various applications. Measuring 2.756 inches (70mm) in thickness, it provides a comfortable grip for users while maintaining the knife's slim profile. The colorful options available for the handle not only add a vibrant flair but also allow for easy identification amongst other tools and gear.

What sets the JLD-YK733 apart is its customization capability. The handle figure is optional, enabling a free combination of designs that can be tailored to match the aesthetic preferences of any brand or consumer group.

Convenient and Safe Design Features

This knife is designed with a clip point blade style, ideal for more precise tasks and offering controlled cutting and piercing capabilities. While the set does not include a pocket clip, the compact and lightweight design of the knife makes it easy to carry in a pocket, pouch, or toolkit.

Safety is paramount in any cutting tool, and the JLD-YK733 offers a lockback mechanism, a tried-and-true system that ensures the blade stays open during use and prevents accidental closures. The hole opening feature provides a simple and efficient way to deploy the blade with one hand, making it a convenient choice for quick tasks.

Tailored for Trade: The OEM Advantage

As an OEM product, the JLD-YK733 is designed for ease of branding and resale. Shieldon understands that businesses require a product that can be effortlessly integrated into their line-up, and this folding knife set is designed with that in mind. The neutral and customizable design allows for the insertion of company logos, special engravings, or unique color patterns that align with brand identities.

Product Specifications at a Glance

- **Blade Material:** 3Cr13 Stainless Steel
- **Handle Material:** Plastic
- **Blade HRC:** 50-52
- **Blade Thickness:** 0.091" / 2.3mm
- **Blade Length:** 1.97" / 50mm
- **Handle Thickness:** 2.756" / 70mm
- **Total Length:** 4.76" / 121mm
- **Weight:** 0.92 oz / 26g
- **Blade Style:** Clip Point
- **Handle Color:** Colorful (Customizable)
- **Lock Mechanism:** Lockback
- **Open Way:** Hole
- **Blade Finish:** Satin
- **Blade Grind:** Flat Grind
- **ODM Regular MOQ:** 1000 sets (5 pieces in 1 set, totaling 5000 pieces)
- **Customization:** Handle figure is optional for a free combination

The Shieldon Difference

Shieldon, as a Manufacturing & Trading Combo, brings a wealth of experience and commitment to quality in every product. The JLD-YK733 folding knife set is no exception, offering businesses the opportunity to source a product that is flexible in its design and reliable in its function.

Ordering and Customization Process

The regular minimum order quantity for the ODM JLD-YK733 set is 1000 sets, amounting to a total of 5000 pieces. This volume ensures a beneficial cost structure while allowing for extensive customization options. Sheldon's team works closely with clients to select the handle patterns, colors, and potential branding elements to create a product that is truly theirs.

In Conclusion

The Sheldon JLD-YK733 folding knife set is a testament to the power of choice in the world of trade and manufacturing. It offers the perfect solution for businesses seeking to expand their product line with a customizable, quality tool that resonates with consumers. Tailored to the needs of the modern market, this knife set stands ready to become an integral part of your offering, embodying the spirit of diversity, choice, and quality that Sheldon prides itself on.

Edge of Excellence: Maintaining Your EDC Folding Knives

Everyday carry (EDC) folding knives are invaluable tools that blend functionality and convenience into daily life. Whether you're a wilderness enthusiast, a craftsperson, or just someone who appreciates the utility of a good blade, knowing how to maintain your EDC folding knife will ensure its longevity and performance. Here, you'll learn the essentials of folding knife upkeep to keep your blade in top condition.

Keep It Clean

After each use, it's crucial to clean your folding knife. Residue from materials cut can corrode the blade and hinge mechanism. Use a mild soap and warm water to remove any dirt, sap, food, or other debris. For tougher grime, a nylon brush can help. After washing, make sure to dry your knife thoroughly. Moisture is the nemesis of metal, and even stainless steel can be susceptible to rust if left damp.

Lubrication is Key

Movement is at the heart of a folding knife's function. Ensure that the pivot point—the part that allows your knife to fold and unfold—is regularly lubricated. A small drop of lubricant can do wonders in protecting against wear and keeping the action smooth. Be cautious not to over-lubricate as excess can attract dirt. Specialized knife or gun oils are recommended, but in a pinch, mineral oil can suffice.

Tighten Up

Regular use can loosen the screws on your knife's body and clip. Use the appropriate screwdrivers to tighten them, but be careful not to over-tighten, as this can strip the screws or hinder the knife's operation. If screws tend to loosen frequently, a thread locker can be applied sparingly to maintain the proper tension.

Sharpening and Honing

A sharp knife is a safe knife. Keep your blade honed to prevent slips or the need for excessive pressure during cutting. Use a whetstone or sharpening rod for regular maintenance. The angle at which you sharpen is crucial; most EDC knives work well with a 20-30 degree angle. If you're not confident in your sharpening skills, consider using a guided sharpening system or seeking professional services.

Avoid Abuse

While it's tempting to use your EDC knife as a catch-all tool, misuse can damage your knife. Avoid using it as a pry bar, hammer, or screwdriver. These actions can harm the blade or handle and potentially void any warranty. Always use the right tool for the job, and your knife will last much longer.

Storage Solutions

When not in use, store your folding knife in a dry environment. A knife sheath or case can protect the blade from dust and moisture, but ensure it's not so snug that it retains any dampness. If you live in a particularly humid climate or plan to store your knife for an extended

period, consider a desiccant pack to absorb moisture or occasionally apply a thin coat of oil to the blade to prevent rust.

Regular Inspections

Periodically inspect your knife for any signs of wear or damage. Check for blade play, which is a side-to-side movement when the knife is open. Some play is normal, but excessive movement might require tightening or professional adjustment. Also, inspect the blade for chips or irregularities that might require sharpening or repair.

Handling with Care

Remember that a folding knife is only as safe as its user. Always cut away from yourself and keep your fingers clear of the blade's path. When closing the knife, ensure that nothing obstructs the blade's path to prevent damage to the knife or injury to your fingers.

In Conclusion

Proper maintenance of your [EDC folding knife](#) is about developing good habits and regular care routines. By keeping your knife clean, lubricated, sharp, and stored correctly, you extend its life and ensure it's ready to perform when you need it most. Treat your knife with respect and care, and it will be a reliable companion for years to come. Embrace these tips as part of

your EDC ethos, and experience the satisfaction that comes with preserving the edge of
excellence.
