

Sleek Elegance: The OEM Army Knife SS-0835 – A Blend of Style and Substance

Welcome to the ultimate blend of style, functionality, and durability - the OEM Army Knife SS-0835, presented by [Shieldon Manufacturing & Trading](#) Combo business. Designed for the contemporary user, this army knife encompasses the essence of a modern multi-tool with its sleek stainless steel handle, 11 versatile functions, and a lightweight profile, making it the hot present for any occasion and a bulk sale superstar.

Unveiling the OEM Army Knife SS-0835: A Modern Marvel

The SS-0835 is not just another army knife; it's a testament to the fusion of cutting-edge design and practical utility. Crafted with the robust 2CR13 stainless steel for the main body and an ergonomically designed stainless steel handle, this multi-tool is a powerhouse of strength and resilience.

Compact and discreet, the SS-0835 measures a mere 3.66 inches when closed and extends to a full working length of 6.1 inches. Despite its comprehensive toolset, it maintains a streamlined profile with a total thickness of 0.63 inches and a width of 0.94 inches. Tipping the scales at just 3.63 ounces, it's a lightweight companion designed to provide maximum utility without the bulk.

Colorful Versatility: More Than Just a Tool

With a handle tinted in a rich blue, among a range of color options, the SS-0835 is as much a fashion accessory as it is a practical tool. The satin finish of the main body adds a touch of sophistication, ensuring that this army knife stands out for all the right reasons.

But it's the 11-in-1 functions that truly define the SS-0835:

1. **Knife Blade:** Precision cutting is at your fingertips with the sleek blade.
2. **Wood Saw:** Tackle the outdoors with the robust wood saw for effortless slicing through timber.
3. **Scissors:** Snip and trim with ease with the ultra-sharp scissors.
4. **Bottle Opener:** Pop open refreshments in a snap – a party favorite.
5. **Can Opener:** Access your canned goods without a hitch, whether you're at home or on the go.
6. **Phillips Screwdriver:** Tighten and tweak with the handy screwdriver, a savior for quick fixes.
7. **Needle:** A resourceful tool for puncturing or stitching materials as needed.
8. **Corkscrew:** Celebrate victories or unwind after a long day; the corkscrew is ready for your finest bottles.
9. **Nail File:** Keep your nails in pristine condition, no matter where you are.

10. **Nail Cleaner:** Tidy up with the dedicated nail cleaner after a day's work.

11. **Ice Breaker:** Not just for breaking the ice socially; this tool can literally chip away ice when required.

Customization and Bulk Purchase: The Business Advantage

With an ODM Regular MOQ set at 3000 units, the SS-0835 is positioned perfectly for bulk sales, corporate gifting, and large-scale distribution. Retailers and businesses can tailor this army knife to reflect their brand identity, choosing from an array of handle colors and adding customized logos or messages through the tinting process.

Practical Gifting: A Cut Above the Rest

The [OEM](#) Army Knife SS-0835 is a present that truly keeps on giving. Ideal for any gender and age, and appropriate for a myriad of occasions from birthdays to graduations, corporate events to outdoor adventures, it's a gift that embodies practicality and thoughtfulness. The SS-0835 is not just an item to own; it's a tool to rely on, an accessory to flaunt, and a gadget to enjoy.

The Perfect Sales Proposition

The SS-0835 is a marvel for retailers. Its attractive price point, combined with its high-quality build and customizable options, makes it a compelling product offering for any store. Whether displayed in a camping and outdoors section, offered as an add-on at checkouts, or presented in gift and novelty shops, the SS-0835 is likely to catch the customer's eye and clinch the sale.

For Every Lifestyle: The SS-0835's Universal Appeal

Catering to a wide demographic, the SS-0835 is the go-to tool for:

- **DIY Enthusiasts:** With a tool for almost every need, it's the perfect companion for home improvement projects.
- **Outdoor Adventurers:** Robust and ready for nature, it's an essential item in any backpack or survival kit.
- **Everyday Heroes:** For the quick-fixes and surprise needs, this army knife has got you covered.

Ensuring Quality and Customer Satisfaction

Shieldon Manufacturing & Trading Combo business prides itself on not only meeting but exceeding industry standards. Each SS-0835 army knife is subject to stringent quality assurance protocols to ensure that your customers receive nothing but the best. With a focus on customer satisfaction, every knife is designed for longevity, ease of use, and ultimate utility.

Wrapping It Up

The OEM Army Knife SS-0835 is a culmination of thoughtful design, multipurpose functionality, and modern aesthetics. It's an offering that aligns with the values of quality-conscious users who seek a reliable tool without compromising on style. For the savvy retailer, it's a product that promises both volume sales and satisfied

customers. Ensure your inventory is complete with the SS-0835—the army knife that’s set to become an indispensable part of your customers’ daily lives.

The Swiss Connection

The army knife, often synonymous with the Swiss Army knife, is a multipurpose tool that has become an icon of utility and smart design. This compact companion is steeped in history, with its origins dating back to the late 19th century.

It all began in 1891 when the Swiss Army decided to procure a new, standardized pocket knife for its soldiers. This knife was intended to be versatile enough to open canned food and disassemble the Swiss service rifle, which required a screwdriver. The first model, called the "Modell 1890," was delivered by the end of the year. It included a blade, a reamer, a can-opener, a screwdriver, and grips made out of dark oak wood, which later evolved into the more durable and hygienic ebony wood.

At the time, Switzerland lacked the capacity to produce the knives in sufficient quantities, so the initial order was placed with Wester & Co. from Solingen, Germany. However, Swiss cutler Karl Elsener, the owner of a company that would later become Victorinox, was not satisfied with this foreign dependence. By 1891, Elsener managed to secure a contract for the Swiss Army and started to produce the Modell 1890 knives in Switzerland.

Victorinox and Wenger

Elsener's company, Victorinox, and its competitor, Wenger, supplied the Swiss Army with knives in the early 20th century. Elsener sought to distinguish his product from his rivals and in 1909 trademarked the term "Swiss Army Knife" for his version. The term is now a registered trademark in many countries. To signify Swiss quality, the knives from Victorinox displayed a white cross on a red shield, while Wenger decorated their knives with a slightly different emblem.

The knives themselves began to evolve. In 1897, Elsener patented a design that included a second spring mechanism allowing for more tools without additional bulk. This design became known as the "Officer's Knife" and was the precursor to the modern Swiss Army knife we know today.

Global Recognition

The Swiss [Army knife](#) gained international fame after World War II. American soldiers stationed in Europe bought them in large quantities for their utility and as souvenirs, but had trouble pronouncing the German name "Schweizer Offiziersmesser." As a result, they referred to it simply as the "Swiss Army knife," which helped to brand the tool internationally.

Innovation and Expansion

Over the decades, the Swiss Army knife has been updated with new technology and tools to remain relevant. The range of implements has expanded to include various blades, screwdrivers, files, saws, and other tools like USB sticks, LED lights, and even digital altimeters. The design has become a cultural icon and is featured in the permanent collection of the Museum of Modern Art in New York due to its classic, recognizable design and multifunctionality.

Today, Victorinox is the sole supplier of multi-purpose knives to the Swiss Army. Wenger was acquired by Victorinox in 2005, thus uniting the two historical brands under one roof.

The Army Knife Today

Modern [Swiss Army knives](#) come in a range of sizes and configurations to cater to different users. They are made with high-quality stainless steel and other durable materials like aluminum for the handles or synthetic shells for the body. The Swiss Army knife continues to be a reliable tool for military personnel, adventurers, and everyday users.

The Swiss Army knife has become more than just a tool; it's a symbol of Swiss ingenuity and a testament to the idea that good design is timeless. Despite being in existence for over a century, the Swiss Army knife has remained relatively unchanged in its core design, proving that some things do not need to be reinvented—just refined.

In conclusion, the army knife's history is a rich narrative of innovation, design, and tradition. It reflects an unchanging commitment to utility and efficiency. For many, owning a Swiss Army knife is not just about having a tool; it's about carrying a piece of history in their pocket. With its multi-functional nature and compact form, the army knife continues to be as relevant and sought after today as it was over a hundred years ago.
