

Cutting Edge Precision: The YML-3418 Paracord Handled Machete Knife

The YML-3418 Machete Knife from [Shieldon Manufacturing & Trading](#) Combo represents a convergence of robust build quality and functional design, meticulously engineered for the modern outdoors enthusiast. This comprehensive purchasing description will walk you through the specifications and features of this remarkable machete, designed for those who demand reliability and efficiency in their outdoor tools.

Product Overview

The YML-3418 is not just a cutting tool; it is a companion for the adventurer, the survivalist, and the tactical professional. As an important segment of the machete knife category, it has been forged to offer exceptional performance in a variety of environments, from the dense underbrush of the forest to the challenges of a rugged outdoor campsite.

Blade Excellence

Blade material: 3Cr13

The choice of 3Cr13 stainless steel for the blade is a testament to Sheldon's commitment to quality. This material is revered for its perfect balance of hardness and corrosion resistance, ensuring the blade withstands the rigors of outdoor use while maintaining its edge integrity.

Blade thickness: 0.118" / 3mm

Blade length: 10.43" / 265mm

The blade measures an impressive 10.43 inches, with a thickness of 3mm, providing the necessary heft for chopping while retaining the agility needed for precision tasks. The blade's generous length makes it ideal for a range of uses, from clearing vegetation to preparing kindling for a fire.

Blade style: Trailing point

The trailing point style of the blade is a feature designed for those who demand versatility. The curve of the blade allows for efficient slicing, making the YML-3418 suitable for a variety of cutting tasks, whether in survival situations or general outdoor activities.

Blade finish: Blackened

Blade grind: Scandinavian

The blackened finish not only gives the blade a sleek, tactical appearance but also serves to reduce glare and minimize maintenance. Paired with the Scandinavian grind, known for its sharpness and ease of resharpening, this machete is as practical as it is visually impressive.

Handle Durability and Comfort

Handle material: Paracord

Handle thickness: 0.768" / 19.5mm

Total length: 16.38" / 416mm

The handle, wrapped in high-quality orange paracord, provides a secure grip in all conditions while adding a unique aesthetic. At 0.768 inches thick, the handle ensures comfort and control,

reducing fatigue over prolonged use. The total length of 16.38 inches offers balanced weight distribution, making the machete feel like a natural extension of the user's hand.

Lightweight and Balanced

Weight: 11.15 oz / 316g

Weighing in at a mere 11.15 ounces, the YML-3418 is engineered for ease of carry without compromising on strength. This lightweight design ensures that the machete can be wielded with precision and agility, enhancing its functionality as a survival tool.

Color and Visibility

Handle color: Orange

The vibrant orange of the paracord handle isn't just for show; it enhances the machete's visibility. If dropped or misplaced, the bright color stands out against natural backdrops, ensuring the tool is easily located.

Sheath and Carry

Sheath: /

The YML-3418 comes without a sheath, providing the purchaser with the flexibility to choose or custom-design a sheath that meets their specific needs. Shieldon's extensive offerings include a range of sheath options that can be tailored to suit the machete and the user's preferences.

Minimum Order Quantities

Regular MOQ: 1200

With a minimum order quantity of 1200, the YML-3418 machete knife is an excellent choice for retailers and distributors looking to stock a high-quality blade that is sure to be in demand among outdoor enthusiasts and professionals alike.

Why Choose the YML-3418 Machete Knife from Shieldon?

When you choose the YML-3418 from Shieldon, you're not just purchasing a knife; you're investing in a piece of equipment that stands up to the challenges of the great outdoors. Shieldon's dedication to craftsmanship ensures that each machete is not only a tool but a trusty sidekick in any adventure.

Advantages for the Sourcing Professional

- **Quality Assurance:** Rigorous quality control processes guarantee that each machete meets high standards of functionality and durability.
- **Design Expertise:** Sheldon's design team is adept at turning concepts into tangible products, ensuring that every detail of the YML-3418 has been crafted with intention.
- **Customization:** While the YML-3418 offers exceptional out-of-the-box features, Sheldon can also accommodate custom requests to create a product that aligns with your brand or market needs.
- **Cost-Effectiveness:** Sheldon's competitive pricing, coupled with the absence of a sheath, allows for cost savings that can be passed on to the customer or reinvested in bespoke accessories.
- **Logistical Proficiency:** With years of experience in the Manufacturing & Trading combo business, Sheldon ensures efficient and reliable delivery of your order, navigating the complexities of logistics with ease.

In conclusion, the YML-3418 machete knife is more than a product; it's a testament to Sheldon's dedication to excellence. Whether for retail purposes or as a significant addition to

an outdoor gear line-up, this machete stands out as a top-tier offering. Purchasing from Shieldon means securing a product that will not only meet but exceed the expectations of the end-user, ensuring satisfaction and fostering loyalty to your brand.

Essentials of Machete Knife Carriage: A Guide for Safe and Effective Handling

A [machete knife](#), with its broad blade and versatile usage, is an indispensable tool for outdoor enthusiasts, gardeners, and survivalists. However, carrying a machete safely is crucial to prevent injury and ensure the tool's longevity. Here's a basic guide to carrying a machete knife that combines safety with accessibility.

Understanding Your Machete Knife

Before you carry a machete, it's important to understand its structure. A machete typically consists of a blade that can range anywhere from 10 to 28 inches in length and a handle that facilitates a firm grip. The size and weight of your machete will influence how you carry it.

Choosing the Right Sheath

The first step in carrying a machete is selecting the appropriate sheath. A sheath serves multiple purposes: it protects the blade from the elements, keeps it sharp, and most importantly, prevents injuries. Sheaths are commonly made from leather, nylon, or Kydex, each offering different levels of durability and protection. Ensure that the sheath fits the blade snugly and has no room for the machete to slide out accidentally.

Attaching the Sheath to Your Body

There are several ways to attach a sheath to your body, and the method you choose depends on your activity and preference:

- **Belt Loop:** For quick access, attach the sheath to your belt using a loop or a hook. The machete should hang from your dominant side and the handle should be within easy reach of your hand for quick drawing.
- **Back Carry:** If you're traveling through dense vegetation, consider carrying the machete on your back to prevent it from snagging on branches. This method is less accessible but offers greater freedom of movement.
- **Shoulder Strap:** Some sheaths come with shoulder straps that allow you to sling the machete across your back diagonally. This is a secure way to carry larger machetes without hindering mobility.

Accessibility and Movement

Your machete should be accessible but not obstructive. Practice drawing the machete from its sheath to ensure you can do so smoothly and safely. When walking, be mindful of the blade's movement. It should remain stable and secured within the sheath at all times.

Local Laws and Regulations

Before carrying a machete in public, familiarize yourself with local laws and regulations regarding bladed tools. Some areas may have restrictions on the length of the blade you can carry or require that it be concealed when not in use.

Maintaining Safety While Carrying a Machete

Safety should always be your top priority when carrying a machete:

- **Keep the Blade Covered:** Always keep the blade covered with a sheath, especially when moving around other people or through areas with dense foliage.
- **Secure the Handle:** Ensure the handle is secured within your grip or strapped down when not in use. A loose handle can result in the machete slipping out and causing injury.
- **Inspect the Sheath:** Regularly inspect the sheath for any damage. A worn or torn sheath can fail to protect the blade and may lead to accidental exposure.
- **Educate Yourself on Handling:** If you're new to using a machete, educate yourself on the proper handling techniques. Incorrect usage can be dangerous to you and others around you.
- **Be Mindful of Others:** When in the presence of others, be mindful of where your machete is at all times. Avoid making sudden movements that could cause alarm or result in the machete coming unsheathed.

Conclusion

Carrying a machete knife isn't just about strapping it to your side and going about your business. It requires careful consideration of the sheath, the method of carry, safety, and legal compliance. By following these guidelines, you can ensure that your machete is transported safely and is ready to use whenever you need it. Remember, a machete is a tool, not a toy, and respecting its potential is key to utilizing it effectively and responsibly.
